

What is eHealth?

The concept of "eHealth" is used to describe the application of information and communications technologies (ICT) across a whole range of functions that, one way or another, affect the health of citizens and patients.

A wide range of potential applications of ICT is now available in the health field and have been implemented to varying degrees across Europe. These include systems ranging from the purely administrative to those for care delivery.

EHTEL is portal into this dynamic and rapidly expanding European business domain.

Why you should join EHTEL

Benefits of Membership

By becoming a member, you will join an organisation, that enables the cultivation of partnerships and networking across the eHealth domain.

Through its members' activities, EHTEL provides a valuable input, as an independent organisation, to the task of influencing eHealth policies in Europe.

Involvement with the Task Forces and Stakeholder Groups gives members an opportunity to share experiences and to understand the lessons learned by others. Our Member-based Organisations Group is leading the way with this approach.

Your own organisation will benefit from the Association's publicity and promotion activities. Our newsletter is widely distributed and read throughout Europe and beyond.

Membership

To discuss membership, please contact
The Liaison Officer at info@ehtel.org
or on +32 (0)2 230 9650.

Who are we?

EHTEL is an association that recognises that integrating ICT into health and social care is rapidly becoming a matter of high political, economic and social significance throughout the regions and nations of Europe.

EHTEL is a platform for

Information

News on the latest political, strategic, regulatory and commercial developments

Empowering the Citizen

Lobbying

Communicating with and influencing others by publishing bulletins, position papers and monographs, and supporting seminars, workshops, conferences and other meetings

ePrescribing

Representation

Ensuring that individuals with the relevant skills and experience are available to participate in committees, meetings and events

eHealth and the Internal Market

Networking

Providing a network within which stakeholders can come together to discuss common interests and explore solutions to common challenges

ICT Supported Disease Management

Co-operation

Co-operating with European and international organisations, societies and associations working in health and social care

Reimbursement and Incentive Structures

Task Forces

The Association supports task forces that pursue specific campaigns on subjects and issues of importance

Assessment of Quality, Productivity and Effectiveness in eHealth
